## Food is Art in Coconut Grove Food & Beverage is a selling tool

By Steven Graffham

At the end of January, Winter Park Photography was involved in an exciting shoot at the Sonesta Hotel & Suites in Coconut Grove. It was a three day shoot involving models and a large team of people to make sure everything was ready and picture perfect.

One thing that really caught our attention was how Sonesta treat their food & beverage as art. When you see their website you will see how intriguing it is. Go to <http://www.sonesta.com/corporate/> you can click to the links to see their whole "food is art" section. This is the baby of Kathy Rowe who was the art director for

our shoot in Miami. The head chef and his team created a spectacle of Peruvian dishes for us to photograph and the team put together a superb display of the food in the lobby. For special events and weddings this would be a fabulous thing to do.

It was a great shoot and we hope to be doing more of

the same for Sonesta or other hotels in the near future. A big thank you to Frank Couzo and Kathy Rowe, Kerrie Rosati and their team.

## New flight from Bristol to Sanford A chance to get on the Tarmac

By Steven Graffham

In February I had the chance to be a bit of an anorak and get on the Tarmac at Orlando Sanford International Airport with Martin Milner, (First Choice Area Manager for Florida, The Caribbean & Costa Rica) to photograph the arrival of the inaugural First Choice Flight from Bristol. The fire department in accordance with aviation tradition had two fire trucks either side of the taxi way to spray a welcoming fountain of water from their hoses to mark the occasion. The aircraft with 62 seats in Star Class Premier landed early, and we made it out to airside with just moments to spare as the Boeing 767's tires touched down.

I only hope that the passengers were warned about the fire engines before hand.

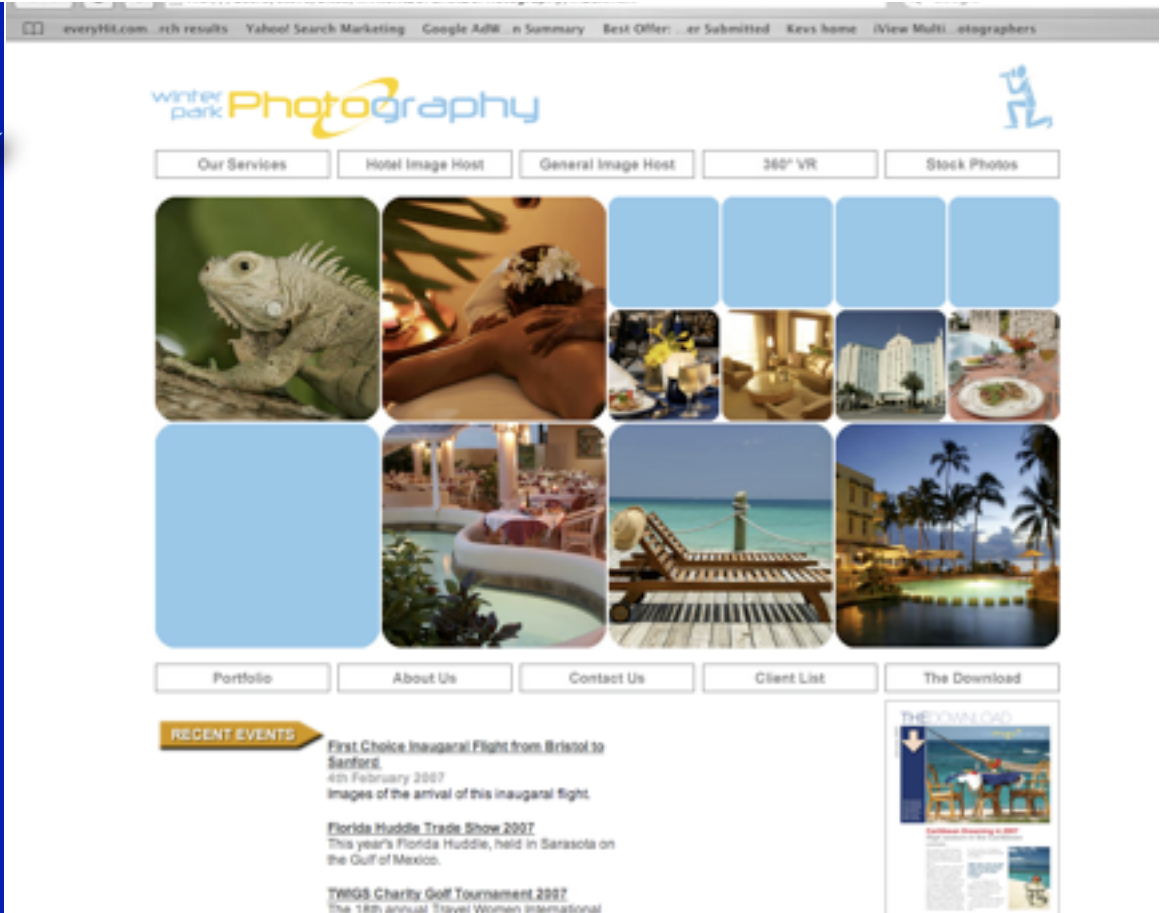

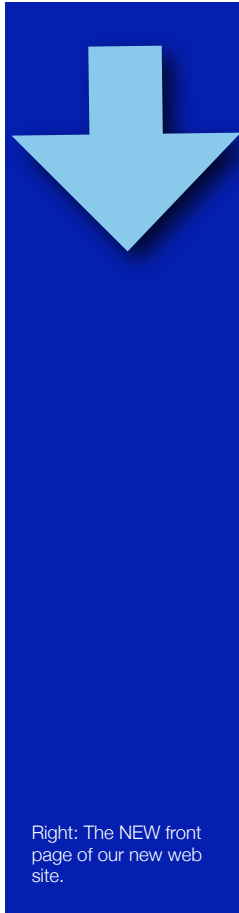

## Sky Resort Management add Kissimmee Amerihost to their inventory

In February we also got to shoot the Amerihost in Kissimmee. Located on highway 192 close to the heart of Kissimmee its surrounded by an abundance of restaurants on a section of the 192 which has had a face lift in recent months. The property is a budget property of a good standard including a continental breakfast which will more than set up a family for a day at the parks. The rooms are cozy and include a fridge and microwave. Just what you need if you don't want to eat out all the time.

For further details contact [Sandy Marshall](#) at Sky Resort Management.

By **Suzanne Graffham**

Winter park photography has finally hired a professional to revamp the weary website. Emma Helling from [links and inks](#) has designed a simple but professional and functional website, for Winter Park Photography. This site was only possible with help from some of our friends. We'd thank everybody who was involved! I hope you all agree it's an improvement on the last website that Steve started 3 years ago. The site grew in pages with the growth in the business. What's next? We are currently working on the Stock

side of the business we have an ever growing library of stock images predominantly from Florida, New York and the Caribbean. Our goal is to have all images on our website for to you view, select, and purchase. If there are specific images you are looking for and can't see on our site drop us an email, if they are in regions we cover we will make sure we capture the perfect shots you are looking for.

We are also using our website behind the scenes to upload our images for our clients. These are

on private links and cannot be accessed from the public Winter Park photography site. We are finding more and more that uploading to the website is an easy way to get our images to our clients. Just one more way technology is working for us all.

At some stage in the future we will try and get some sort of podcast on the site too. Just because we want to more than anything else. We want to make the site an interesting and informative one that is an extension of the company.
